TIPS FOR MAXIMUM IMPACT

1. Prepare assets first: Logo (multiple sizes), screenshots, banner, one-liner tagline, short description (150 chars), medium description (500 chars), full description (2000 chars). 2. Consistent branding: Use same name, logo, and description across all platforms. 3. Social proof: Before submitting, ensure Twitter/X, Telegram, Discord, and GitHub are active with content. 4. Smart contract ready: Many dApp/crypto directories require a deployed contract address on Polygon. 5. Track submissions: Create a spreadsheet tracking: site name, submission date, status (pending/approved/rejected), URL of listing. 6. Product Hunt strategy: This deserves special planning. Pick a Tuesday-Thursday. Rally community for upvotes. Prepare a compelling maker comment. 7. GitHub Awesome Lists: These require pull requests. Find lists like awesome-polygon, awesome-web3, awesome-dao, awesome-ai. Follow each list's contribution guidelines. 8. Leverage the Polygon angle: Polygon ecosystem is well-documented. Being listed on Polygon's official ecosystem page is a strong credibility signal. 9. AI Agent angle is hot in 2026: AI agent directories are booming. Position 1BZ.BIZ as an AI agent platform for maximum traction on these directories.
